Attachments: Chemours_GenX_sampling request2_4_17_18_draft.docx

I've heard nothing back from OCGR on any need to do a communications plan on this letter to Chemours other than Joan Schafer asking we send a copy of the signed letter to her so she can get it posted on HQ's web site.

With that, please package up for concurrence the letter(attached), the revised table of PWS and private wells to be sampled and the copy of the first letter.

We'll also need a revised PDF of the well sites to be sampled with PII redacted or removed so that will be ready to go to Joan after Kate signs it. Kate knows the letter will be on its way to her.

Thanks!

Rick

Subject: Chemours_GenX_sampling request2_4_17_18_draft.docx

Attached is the final draft letter to Chemours requesting another round of sampling. On Monday, 4/23, we held a conference call with Chemours regarding the sampling and they have verbally agreed to resample all the locations they sampled in February as well as the additional sites we are adding as "step-out" sites added to continue to discern how far from the plant GenX can be detected in the groundwater. The letter will go out with a list of systems to be sampled. We shared a draft list with Chemours and they found that one or two of the additional private wells we selected were hooked up to public water sometime in the past, so the list is being revised concurrently with this draft going through necessary channels.

As before, the letter is set up for Kate's signature. We won't put it into concurrence until we get the go-ahead from all parties. Kate/Dom, will you be sharing with the RA/DRA?

We will also share this with Region 5 so they can get it up their chain. This letter includes comments from Region 5 and one person from OECA. Others in OECA I sent it to never responded (they reviewed the first letter). OGWDW did not express interest in seeing the letter.

Let us know if you have any comments/questions or feedback from the 16th floor.

Thanks

Rick
